Grand Junction, Colorado

Summary

By some miracle, I was chosen in my Advanced Computers high school course to help create a website for a local company. After having a lot of fun working on the project and getting paid for it, I realized that was something to build on. Now I just want to learn as much as possible and join a team to contibute to the real world. Wish me luck!

- Node.js
- Git/Github
- Communication

Experience

Sales Associate

Office Depot • Grand Junction, Colorado   05/2020 - Present

My role in this job is to fill in where need be. Whether I need to help a costumer with a computer issue, sale a printer, stock inventory, or be a cashier, I am in there making the most of it!

Freelance Web Developer

Freelancing • Grand Junction, Colorado   02/2016 - Present

Like previously stated, I worked on a local companies website but I didn't stop there! Since then, I've worked on many other webites for friends and family that were in need. I strive to be an accomplished full-stack developer in the near future.
